

WE MAKE SERVICE **CONTINUITY RELIABLE**

The world's most advanced, fully managed platform or software for peace of mind, no matter the situation.

YOUR LIVE VIDEO & VOD **ALWAYS RUNNING**

Run your most demanding media processing and delivery workflows on VOS® to assure that your services are always available. It leverages the flexibility of cloud-native infrastructures for total service continuity, 24/7/365.

Connect directly to your operations from any where in the world. Quickly modify channels, adjust settings and enhance viewer's experience no matter where you are. You will deliver exceptional video quality and a flawless experience for your viewers.

Our cloud-based solution gives you the peace of mind that in any situation or event, you keep services up and running. It powers millions of simultaneous streams, thousands of live channels, countless video on-demand requests from all around the globe.

Smarter video delivery for business as usual.

You can rely on our experience. We develop and manage live video streams for some of the largest and most ambitious service providers around the world.

Decades of media industry expertise are working for you.

Reliable Dual Cloud Instances.

VOS is built with unparalleled uptime to keep your content on-air. Dynamic dual cloud instances synchronize your video and keep streams fully aligned.

The cloud agnostic solution is fully redundant and ready to be deployed to keep your operations live. This neutrality enables rapid integration of new systems and services at any time.

Proactivity from Source to Screen.

End-to-end capabilities running in the cloud simplify updates and upgrades to your workflow. You will be able to keep your system up-to-date no matter where you are.

Our worldwide team monitors your services and notifies you ahead of time to ensure your system's functionality. Now you can accelerate your service uptime and be ready for anything.

Secure & Remote DevOps.

Our DevOps team guarantees the highest levels of availability and of reliability, around the clock. All IT infrastructures, media processing and delivery applications are always fully functional, with zero downtime.

We use the secure Harmonic Hub to remotely connect to your platform and keep your services running. We have teams all over the world, ready to help you when in need.
