SERVICE AND SUPPORT

CUSTOMER-FOCUSED, COMPREHENSIVE SUPPORT

Harmonic’s passion for video extends far beyond developing products, we are committed to your success. We’ve brought together a global team of industry professionals, ready to assist you 24/7. We use our experience in video appliance support to optimize your video infrastructure system uptime – so you can focus on your business.

Harmonic’s OneCare™ service level agreement (SLA) plans raise the bar for world-class hardware and software support. You’ll have peace of mind with comprehensive, extended service and support for all Harmonic video systems. Choose between standard or premium packages based on your infrastructure and business objectives. OneCare plans are tailored for traditional hardware-based products and our newest software-based systems running on off-the-shelf servers.

Your choice of plan will be based on four key factors:

The economic impact of system downtime	Your self-support capabilities	The complexity of your infrastructure	Your number of on-site spares
--	--------------------------------	---------------------------------------	-------------------------------

All of our OneCare SLA packages cover hardware as well as software, including access to the latest software releases. The Standard OneCare SLA is ideal for most operations where the economic impact of downtime is relatively low and self-support capabilities are significant. The Premium OneCare SLA is the preferred solution for operations where the economic impact of downtime is high, or self-support capabilities are limited.

With each package you’ll have access to the OneCare portal to track progress on your cases, access new software releases, discover release notes, and more. The one-stop portal accelerates case investigation and closure by streamlining the support and dialogue with our Technical Assistance Center (TAC) team.

HIGHLIGHTS

- Comprehensive service and support
- Encompasses all Harmonic video appliances
- Available 24/7/365 TAC access
- Choice of plans to meet your self-support capabilities and infrastructure complexity
- Access to software releases via the OneCare portal
- Priority case management and escalation
