

WE MAKE LIVE VIDEO **STREAMING SIMPLE**

Jackson Energy Authority's E+ Premier is a fully managed hosted solution powered by Harmonic's VOS[®]360, the world's most advanced streaming platform.

E+ Premier offers both streaming video and MPEG-2/4 Multicast feeds with exceptional quality and 24/7 support.

A SMARTER VIDEO SOLUTION FOR **CABLE OPERATORS**

Deliver a modern user experience to your customers with TV as an app running on any devices.

With a managed service that includes both streaming and Multicast, you can transition from legacy to streaming at your own pace.

Leverage dynamic ad insertion (DAI) to tap into new revenue streams unavailable to traditional digital program insertion (DPI).

E+ Premier is Affordable.

No compromise on features, we aggregate multiple MVPDs on E+ Premier and share components of the platform to achieve massive cost-savings.

Plus, there is almost no upfront CAPEX investment.

Keep it Simple.

Outsource the complexity and cost of headend management.

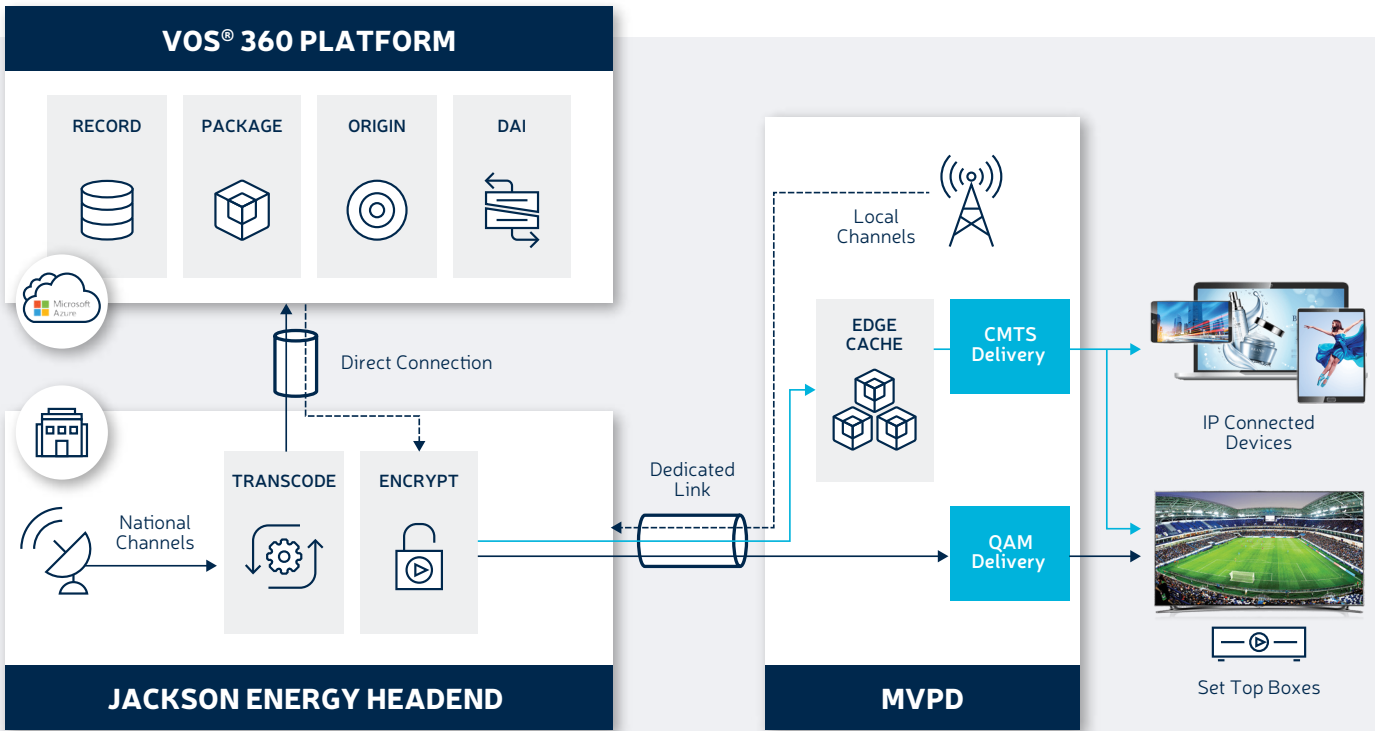

Reliable & Secure.

Our 24/7 DevOps teams continuously and pro-actively monitor your streaming service.

Past & Future Proof.

Our cloud-based solution stays up to date with the latest streaming requirements, and supports legacy Multicast with the best MPEG-2/4 compression.

E+ PREMIER
