

## Memorandum

**Date:** April 2, 2014  
**To:** Harmonic Sales and Channel Partners  
**From:** Tricia Justice, Spectrum Product Manager  
**Subject:** Announcing Availability of the Spectrum 7.5.1.0 Service Release

We are pleased to announce the Spectrum 7.5.1.0 and SystemManager 5.29.1.0 service releases are now available for Spectrum and MediaDeck products. Harmonic strongly recommends that users upgrade to 7.5.1.0 to take advantage of a number of reliability improvements and resolved issues in this release, particularly regarding SAS-based MediaDirectors in an EFS configuration.

This release also includes the following new ChannelPort feature:

Support for down-conversion of graphics when using Independent Branding

A new mode now allows for down-conversion of HD graphics to SD for selected graphic layers when doing Independent Branding ployout on a ChannelPort. Down-conversion of the graphic is only active when the Primary version of the graphic is present in the graphics directory but the Secondary version is not present.

For additional information regarding new features, resolved issues, and compatibility with third party applications, please see the release notes. For download information regarding Spectrum 7.5.1 and SystemManager 5.29.1, please contact Harmonic Technical Support:
