9. EXPORT CONTROL: You agree that the Products and Software will not be shipped, transferred, or exported into any country or used in any manner prohibited by the United States Export Administration Act or any other export laws, restrictions, or regulations (the "Export Laws"). You will indemnify, defend and hold us harmless from any and all claims arising therefrom or relating thereto. In addition, if the Products or Software are identified as export controlled items under the Export Laws, you represent and warrant that you are not a citizen, or otherwise located within, an embargoed nation (including without limitation Iran, Iraq, Syria, Sudan, Libya, Cuba, North Korea, and Serbia) and that you are not otherwise prohibited under the Export Laws from receiving the Software. All rights to the Products and Software are granted on condition that such rights are forfeited if you fail to comply with the terms of this Agreement.

8. TERM; TERMINATION: The term of this Agreement shall continue unless terminated in accordance with this Section. We may terminate this Agreement in the event that you fail to comply with any of your obligations hereunder. You may terminate this Agreement any time by terminating use of the System. Except for the first sentence of Section 2 ("License") and for Section 4(a) ("Limited Warranty"), all provisions of this Agreement shall survive termination of this Agreement. Upon any such termination, you shall certify in writing such termination and non-use to us.

7. SUPPORT: Updates, upgrades, fixes, maintenance or support for the System (an "Upgrade") after the limited warranty period may be available on a network only if and as permitted by its Documentation. You may make one (1) back up copy of the object code of the Software for archival purposes only. Evaluation Software will be run in a lab, nonproductive environment. Results of any benchmark or other performance tests may not be disclosed to any third party without our prior written consent. Title to and ownership of the Software and Documentation, and all copyright, patent, trade secret, trademark, and other intellectual property rights in the System, shall remain our or our licensors' property. You shall not remove or alter any copyright or other proprietary rights notice on the System. We reserve all rights not expressly granted.

5. LIMITATION OF LIABILITY: WE AND OUR AFFILIATES, SUPPLIERS, LICENSORS, OR SALES CHANNELS ("REPRESENTATIVES") SHALL NOT BE LIABLE TO YOU FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL, PUNITIVE, OR EXEMPLARY DAMAGES OF ANY KIND, INCLUDING BUT NOT LIMITED TO LOST REVENUES, PROFITS OR SAVINGS, OR THE COST OF SUBSTITUTE GOODS; HOWEVER CAUSED, UNDER CONTRACT, TORT, BREACH OF WARRANTY, NEGLIGENCE, OR OTHERWISE, EVEN IF WE WERE ADVISED OF THE POSSIBILITY OF SUCH LOSS OR DAMAGES. NOTWITHSTANDING ANY OTHER PROVISIONS OF THIS AGREEMENT, WE AND OUR REPRESENTATIVES' TOTAL LIABILITY TO YOU ARISING FROM OR RELATING TO THIS AGREEMENT OR THE SYSTEM SHALL BE LIMITED TO THE TOTAL PAYMENTS TO US UNDER THIS AGREEMENT FOR THE SYSTEM. THE FOREGOING LIMITATIONS SHALL NOT APPLY TO DEATH OR PERSONAL INJURY TO PERSONS OR TANGIBLE PROPERTY IN ANY JURISDICTION WHERE APPLICABLE LAW PROHIBITS SUCH LIMITATION. YOU ARE SOLELY RESPONSIBLE FOR BACKING UP YOUR DATA AND FILES, AND HEREBY RELEASE US AND OUR REPRESENTATIVES FROM ANY LIABILITY OR DAMAGES DUE TO THE LOSS OF ANY SUCH DATA OR FILES. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO SUCH EXCLUSIONS MAY NOT APPLY TO YOU.

6. CONFIDENTIALITY: Information in the System and the associated media, as well as the structure, organization and code of the Software, are proprietary to us and contain valuable trade secrets developed or acquired at great expense to us or our suppliers. You shall not disclose to others or utilize any such information except as expressly provided herein, except for information (i) lawfully received by the user from a third party which is not subject to confidentiality obligations; (ii) generally available to the public without breach of this Agreement; (iii) lawfully known to the user prior to its receipt of the System; or (iv) required by law to be disclosed.

7. SUPPORT: Updates, upgrades, fixes, maintenance or support for the System (an "Upgrade") after the limited warranty period may be available at separate terms and fees from us. Any Upgrades shall be subject to this Agreement, except for additional or inconsistent terms we specify. Upgrades do not extend the limited warranty period.

6. TERM; TERMINATION: The term of this Agreement shall continue unless terminated in accordance with this Section. We may terminate this Agreement at any time upon default by you of the license provisions of this Agreement, or any other material default by you of this Agreement not cured with thirty (30) days after written notice thereof. You may terminate this Agreement any time by terminating use of the System. Except for the first sentence of Section 2 ("License") and for Section 4(a) ("Limited Warranty"), all provisions of this Agreement shall survive termination of this Agreement. Upon any such termination, you shall certify in writing such termination and non-use to us.

5. EXPORT CONTROL: You agree that the Products and Software will not be shipped, transferred, or exported into any country or used in any manner prohibited by the United States Export Administration Act or any other export laws, restrictions, or regulations (the "Export Laws"). You will indemnify, defend and hold us harmless from any and all claims arising therefrom or relating thereto. In addition, if the Products or Software are identified as export controlled items under the Export Laws, you represent and warrant that you are not a citizen, or otherwise located within, an embargoed nation (including without limitation Iran, Iraq, Syria, Sudan, Libya, Cuba, North Korea, and Serbia) and that you are not otherwise prohibited under the Export Laws from receiving the Software. All rights to the Products and Software are granted on condition that such rights are forfeited if you fail to comply with the terms of this Agreement.
10. **U.S. GOVERNMENT RIGHTS:** The Software and the documentation which accompanies the Software are "Commercial Items," as that term is defined at 48 C.F.R. §2.101, consisting of "Commercial Computer Software" and "Commercial Computer Software Documentation," as such terms are used in 48 C.F.R. §12.212 or 48 C.F.R. §227.7202, as applicable. Consistent with 48 C.F.R. §12.212 or 48 C.F.R. §§227.7202-1 through 227.7202-4, as applicable, the Commercial Computer Software and Commercial Computer Software Documentation are being licensed to U.S. Government as end users (a) only as Commercial Items and (b) with only those rights as are granted to all other end users pursuant to the terms and conditions herein. Harmonic, 4300 North First Street, San Jose, CA 95134, U.S.A.

11. **GENERAL:** You shall not assign, delegate or sublicense your rights or obligations under this Agreement, by operation of law or otherwise, without our prior written consent, and any attempt without such consent shall be void. Subject to the preceding sentence, this Agreement binds and benefits permitted successors and assigns. This Agreement is governed by California law, without regard to its conflicts of law principles. The U.N. Convention on Contracts for the International Sale of Goods is disclaimed. If any claim arises out of this Agreement, the parties hereby submit to the exclusive jurisdiction and venue of the federal and state courts located in Santa Clara County, California. In addition to any other rights or remedies, we shall be entitled to injunctive and other equitable relief, without posting bond or other security, to prevent any material breach of this Agreement. We may change the terms, conditions and pricing relating to the future licensing of our Systems and other intellectual property rights, including this Agreement, from time to time. No waiver will be implied from conduct or failure to enforce rights nor effective unless in a writing signed on behalf of the party against whom the waiver is asserted. If any part of this Agreement is found unenforceable, the remaining parts will be enforced to the maximum extent permitted. There are no third-party beneficiaries to this Agreement. We are not bound by additional and/or conflicting provisions in any order, acceptance, or other correspondence unless we expressly agree in writing. This Agreement is the complete and exclusive statement of agreement between the parties as to its subject matter and supersedes all proposals or prior agreements, verbal or written, advertising, representations or communications concerning the System.

Every reasonable attempt has been made to comply with all licensing requirements for all components used in the system. Any oversight is unintentional and will be remedied if brought to the attention of Harmonic at support@harmonicinc.com.
In Harmonic documents, special symbols and fonts to call your attention to important information.

**DANGER:** The Danger symbol indicates information that, if ignored, can cause physical harm to you.

**CAUTION:** The Caution symbol indicates information that, if ignored, can adversely affect the performance of your Harmonic product, or that can make a procedure needlessly difficult.

**NOTE:** The Note symbol indicates especially important information you need, or it may provide additional information that applies in only some carefully delineated circumstances.

**IMPORTANT:** The Important symbol indicates information that should stand out when you are reading product details and procedural information.

**TIP:** The Tip symbol indicates parenthetical information that is not necessary for performing a given procedure, but which, if followed, makes the procedure easier, smoother, or more efficient.

In addition to these symbols, this guide may use the following text conventions:

Chapter 1

Introduction

This guide provides information to help you replace components in your Spectrum device or system. Make sure that you read all safety warnings and instructions, and that you have received a replacement component from Harmonic before you begin any of the procedures in this guide.
Chapter 2

Spectrum X component replacement

The following components may be replaced in the Spectrum X: the bezel, hard drive, fan assembly, SDI card, and power supply.

- Replacing the bezel
- Replacing a drive
- Replacing a fan assembly
- Replacing an SDI I/O card
- Replacing a power supply unit

Replacing the bezel

Over time, the bezel LEDs can wear out. Replacement bezels are available from Harmonic.

⚠️ CAUTION: The front panel is susceptible to electrostatic discharge (ESD) when the bezel is removed. Wear the appropriate ESD protection when you remove the bezel.

Removing the Spectrum X bezel

The bezel may be removed during operation.

1. Unlock the bezel by loosening the two captive thumb screws.
2. Pull the bezel straight away from the chassis.
3. Disconnect the USB cable.

Example:
Installing the Spectrum X bezel

Align the bezel in front of the chassis so that the Harmonic Inc. logo appears on the top left corner.

⚠️ **CAUTION:** The front panel on the Spectrum server is susceptible to electrostatic discharge (ESD) when the bezel is removed. Wear the appropriate ESD protection when you remove the bezel.

1. Connect the USB cable inside the bezel to the right-hand USB port on the front panel. (The other USB port is covered.)

2. Keeping the corners aligned, press the bezel straight onto the chassis. The USB cable will form a loop that fits inside the metal panel of the bezel.

3. Hand-tighten the two captive thumb screws to secure the bezel in place.

**(NOTE):** After installing the bezel, it may take up to 30 seconds for the front panel LEDs to return to their previous state.
Replacing a drive

A Spectrum X operating in internal storage mode has four hot swappable drives. If a drive fails, replacement drives are available from Harmonic. Each drive is shipped pre-installed in the drive carrier.

About replacement drives

Replacement drives must meet certain criteria. In the event of a drive failure, replacement drives are available from Harmonic.

⚠️ IMPORTANT: Use ONLY Harmonic-supplied replacement drives. Drives from any other source will be excluded from coverage under the Harmonic product limited warranty and maintenance services programs. In addition, any errors or damages caused by the use of drives provided from any other source will cause the entire product to be excluded from coverage under the Harmonic product limited warranty and maintenance services programs.

思った: Replacement drives should have the same or greater drive capacity as those they are replacing, and their form factor must match the other drives in the enclosure.

If you wish to install a Harmonic-supplied drive model that is not supported by your current version of Spectrum firmware, you may need to install a "DDC" configuration file to your video server, which enables you to install and use the new drive. For details, see "Installing a DDC file" in the Harmonic SystemManager User Guide.

Be sure that you have a replacement drive on hand before removing the failed drive. You may wish to have more than one replacement drive on hand in case the first is not responsive.

Drive slot numbers

Drives are numbered from left to right beginning with the number 1.

Figure 2-1: Drive slot numbers in the Spectrum X

Failing a drive

Fail a drive that is experiencing a loss of data to remove it from a RAID set.

This procedure is a prerequisite to replacing a drive and is performed on the Drive Properties page in SystemManager.

1. From the Configuration tab, click the Disk Utilities icon. The Disk Utilities page displays.

2. Click the icon for the Spectrum server that contains the drive you wish to fail. The Disk utilities page for that server appears.

3. Click the Disk Drive icon (or hyperlink).
Chapter 2: Spectrum X component replacement

The **Drive Properties** page displays.

4. At the bottom of the page, click **Fail Drive**. A confirmation dialog appears.

5. Click **OK**.

6. Navigate to the Spectrum server **Disk utilities** page to verify that the drive state is reported as **Dead, Failed**.

**Verifying which drive to remove**

When replacing a failed drive, it is critical that you identify which drive to remove by identifying the slot number in SystemManager and then noting the Activity LED on the physical drive.

1. From the **Drive Properties** page, identify the **MediaStore Slot Number** of the failed drive.

2. Find the physical location of the drive and note the state of the activity LED for this drive. The Activity LED should be off, indicating that the drive is not being actively used. If it is blinking, this is the wrong drive to remove.

3. If you identify the correct drive, remove the drive according to the instructions in "Removing a failed drive".

   🔄 **CAUTION:** Wait 30 seconds before unlatching the drive.

4. If you do not identify the correct drive, call Harmonic Technical Support and do not continue with this procedure.

**Removing a failed drive**

It is critical that you identify the correct drive. Comparing the serial number on the disk drive to the serial number displayed in SystemManager is the best way to do this.

acja: Drive spin-down. Damage can occur to a drive if it is removed while still spinning. We recommend that you perform all steps in the following procedure. Before removing a drive from an enclosure, wait 30 seconds to ensure that the drive has stopped spinning.

⚠ **DANGER:** Observe all conventional ESD precautions when handling Spectrum devices and components.

**Before you begin**

Unpack the replacement component and visually inspect for any damage. If it is damaged, call Harmonic Technical Support for assistance and do not continue with this procedure.

1. With the bezel removed, press the green release button on the drive carrier and pull open the lever.
2. Slide the drive carrier out of the drive bay.

   **Example:**
Replacing a drive

3. Compare the serial number found on the top of the drive with the serial number found on the **Drive Properties** page.
   - If the serial numbers match, continue with installing the new drive.
   - If the serial numbers do not match, wait at least 15 seconds after removal, then reinsert the drive. Call Harmonic Technical Support immediately, and do not continue with this procedure.

Installing a replacement drive

Verify that the new drive is reported as Alive and monitor the progress of the RAID rebuild after installing it.

**NOTE:** When installing a drive, ensure that the adjacent drive is fully installed. Inserting a drive carrier and attempting to lock its handle next to a partially installed carrier can damage the partially installed carrier's shield spring and make it unusable.

**NOTE:** To maintain proper system cooling, all externally accessible drive bays must be populated with a drive carrier.

1. Press the green release button on the replacement drive carrier to open the lever.
2. Insert the drive carrier into the bay, sliding the drive until it contacts the backplane.
3. Close the drive carrier release handle to lock the drive into place.

**Example:**
Chapter 2: Spectrum X component replacement

The drive will power on and the activity LED will change to green.

**NOTE:** If the activity LED does not light, unlatch the drive and then re-seat it.

Within three minutes, the drive should appear on the Disk Utilities page.

4. From the Disk Utilities page, verify that the drive is reported as **Alive** by the MediaCenter.
   - If it is reported as **Alive**, you may continue to the next step.
   - If the drive is not reported as **Alive** and another drive is available, bypass the first drive. Follow instructions in "Removing a failed drive", then repeat Step 1 through Step 4 using the second drive. If successful, continue to the next step. If unsuccessful, contact Technical Support for assistance.
   - If the drive is not reported as **Alive** and you do not have another drive available, contact Technical Support.

5. On the RAID Utilities page, monitor the status of the RAID set.
   The status should change from **Compromised** to **Rebuilding** immediately. If it does not, start the rebuild manually by clicking **Start Rebuild**.

6. Periodically monitor the rebuild until complete.
   Once complete, the RAID status changes to **Normal, Attached, Viable**.

What to do next
If you replaced a failed drive with a new drive from Harmonic, use the packaging materials (carton, cushion, and electrostatic sensitive bag) from the replacement disk drive to carefully repackage the failed
Replacing a fan assembly

The Spectrum X contains two fan assemblies, each with three individual fans. In the event of a fan failure, you must replace the fan assembly.

Fan slot numbers

Fans are numbered from left to right when looking at the front panel. Be sure to correctly identify the failed fan before removing it from the chassis.

Figure 2-2: Fan slot numbers

Removing the system cover

A non-skid surface may be needed to prevent the server system from sliding on your work surface.

Before you begin

Unpack the replacement component and visually inspect for any damage. If it is damaged, call Harmonic Technical Support and do not continue with this procedure.
Chapter 2: Spectrum X component replacement

⚠️ **CAUTION:** Power down the Spectrum X and unplug all peripheral devices and power cables.

1. Using a screwdriver, remove the top cover screw(s).
2. Loosen the two captive thumb screws located on the back edge of the system cover.
3. Slide the cover back and lift upward.

**Example:**

Removing the air duct

You must remove the air duct in order to access the fan connector pins on the server board.

⚠️ **CAUTION:** The air duct is required for proper air flow within the server system. Always operate your system with the air duct cover in place.

Remove the air duct by lifting it straight up.

**Example:**
Replacing a fan assembly

Each fan assembly is designed for tool-less removal and installation.

1. Disconnect the three 10-pin fan connectors from the server board.

   **NOTE:** For the purpose of showing the fan connectors, which are behind the fan assembly, the following image shows the fan assembly removed. However, the failed fan assembly should still be installed at this time.

   **Example:**

---

Spectrum X Component Replacement Guide

15
2. Lift up the fan assembly from the chassis.

   Example:
3. Align the replacement fan assembly with the mounting pins on the chassis base.

4. Ensure that no fan cables are trapped beneath the fan assembly, and then push down until firmly seated.

**Example:**
5. Connect the three fan cables to the fan connectors on the server board in numerical order.

   Example:
Installing the air duct

If placed correctly, the air duct should sit flat and securely in place.

⚠️ **CAUTION:** The air duct is required for proper air flow within the server system. Always operate your system with the air duct cover in place.

1. Position the air duct in front of the system fans and over the processors and memory.
2. Carefully lower the air duct into place.

   Example:
Installing the system cover

The server system must be operated with the system cover in place to ensure proper cooling.

1. Place the system cover onto the chassis and slide forward until the front edge of the system cover is pressed up against the back edge of the front drive bay.

2. Hand tighten the two captive thumb screws at the back of the chassis.

3. Using a screwdriver, install the top cover screw(s).

Example:
What to do next
Follow instructions in the Spectrum System Installation Guide for reconnecting the Spectrum X to your Spectrum system and powering on the device.

Replacing an SDI I/O card
Be sure to complete all of the procedures in this section in order.

Deactivating players
Deactivate a player when you do not want an automation system to be able to automatically enable the player for play and record.

NOTE: In SystemManager, a MediaPort 7000 series appears as two separate MIP-7XXX or CPT-8XXX devices, and a Spectrum X appears as two separate MIP-9XXX devices.

1. Click the Player Configuration button in the left-hand column. The Player Configuration page appears.
2. Click the icon for the Spectrum server on which the players reside. The Player List page appears.
3. Check the box for each Player that you wish to deactivate.
Chapter 2: Spectrum X component replacement

NOTE: If replacing a Spectrum server or I/O module, be sure to select all active Players associated with the server or module.

4. Click **Deactivate Selected**.

**Detaching an I/O module from players**

Detach a device from players when you wish to replace a MediaPort, ChannelPort, or SDI I/O module.

1. From the **Configuration** tab, click the **Player Configuration** button in the left-hand column. The **Player Configuration** window displays.

2. Click the icon for the Spectrum server on which the players reside. The **Player List** page appears.

3. Find a player associated with the I/O module you wish to replace and click **Edit**. The **Edit Player** page appears.

4. In the **Track** section of the page, click **Attached Devices**. The **Attach Devices** page appears.

5. In the **Attach** column, de-select each device you wish to detach from the player.

6. Click **Done**. The system returns you to **Edit Player** page.

7. Repeat Steps 4-6 to detach devices from another track of the Player associated with the module you are replacing.

8. Repeat this process to detach devices from another Player associated with the module you are replacing.

**Winking the Spectrum X**

In a system with more than one Spectrum X, the wink function can help you identify the Spectrum X that needs to be serviced.

On the Spectrum X, the wink function activates the light bar on the front panel.

1. From SystemManager, click the **Configuration** tab to display the **Configuration** page and **System Diagram**.

2. Click the icon for the component you wish to wink. The **Properties** page appears.

3. From the **General Information** section of the page, view the **Wink State**.
   - If currently **Off**, click **Wink On**.
   - If currently **On**, click **Wink Off**.
Replacing an SDI I/O card

SDI I/O card slot positions

If your system has more than one SDI I/O card, confirm the slot position before removing the failed card. When facing the rear panel, slot 1 is the left-hand SDI I/O card, and slot 2 is the right-hand SDI I/O card.

SystemManager displays the SDI I/O card slot position in three places:

- **On the System Diagram page**
  
  When viewing a Spectrum X, the SDI card in slot 1 is always shown as the top-most I/O module, as shown below:

  ![System Diagram](image)

  - **Slot 1**
  - **Slot 2**

- **On the I/O Module Properties page**
  
  The **Slot** field displays 1 or 2 to show the position of the corresponding SDI I/O card, as shown below:

  ![I/O Module Properties](image)

- **If you have attached the SDI I/O card to a player, the Attach Devices page displays the slot position in the Device column, as shown below:**

  ![Attach Devices](image)
Removing the system cover

A non-skid surface may be needed to prevent the server system from sliding on your work surface.

Before you begin

Unpack the replacement component and visually inspect for any damage. If it is damaged, call Harmonic Technical Support and do not continue with this procedure.

**CAUTION:** Power down the Spectrum X and unplug all peripheral devices and power cables.

1. Using a screwdriver, remove the top cover screw(s).
2. Loosen the two captive thumb screws located on the back edge of the system cover.
3. Slide the cover back and lift upward.

**Example:**
Removing an SDI I/O card

For a Spectrum X with two SDI I/O cards, be sure that you have identified the slot position of the failed card.

**NOTE:** The images below show the removal of an SDI card from PCI Riser 1; however, the instructions for removing an SDI card from PCI Riser 2 are the same.

1. If your Spectrum X has two SDI cards installed, disconnect the I/O cable from the failed SDI card by pressing the release button underneath the cable end and then, keeping the release button depressed, gently pulling the cable out of the connector.

   **CAUTION:** Lay the free end of the I/O cable away from the PCI riser assemblies to ensure that you do not damage it while you are replacing the SDI card.

Example:
2. From the outside of the chassis, press the riser assembly faceplate in and upward until the riser becomes dislodged.

3. Grasp the riser assembly with both hands and lift straight up.

Example:
4. Remove the fastener screw that secures the card to the riser bracket.

5. Slide the card out of the riser bracket.

Example:
Deleting an I/O module from SystemManager

Once you have removed the module from the chassis, delete the corresponding I/O module from SystemManager.

1. Click the **Diagnostics** tab to display the **Diagnostics** page.
2. From the **Device Maintenance** section in the left-hand column, click the **Remove Device** icon to display the **Remove Device** page.
3. Scroll to the **I/O Modules** section of the page and locate the module you wish to remove.
4. From the **Select** column, check the box for the I/O module you wish to remove, and then click **Remove**. A confirmation message appears.
5. Click **OK**. After a brief pause, a message appears indicating that the device has been removed (it has also been removed from the **System Diagram**).
6. Click **OK** to return to the **Remove Device** page.
Replacing an SDI I/O card

Installing the replacement SDI I/O card

When installing the PCI riser assembly, do not rock the riser assembly into place. Doing so can damage the contact pins within the riser slot.

NOTE: The images below show the installation of an SDI card in PCI Riser 1; however, the instructions for installing an SDI card in PCI Riser 2 are the same.

1. Insert the replacement card in the same PCI slot from which you removed the failed card, ensuring that the edge connector is fully seated inside the PCI slot on the riser bracket.

   Warning: Each PCI add-in card is designed to work in a specific PCI slot. Installing the replacement card in a different PCI slot is not supported.

2. Secure the card to the riser bracket with the fastener screw.

   Example:

3. Grasp the riser assembly with both hands and lower the front end of the riser assembly first, aligning the riser edge connector with the corresponding riser slot on the server board.

4. Lower the back end of the riser assembly, lining up the tabs on the faceplate with the holes on the back panel of the chassis.

   Example:
5. Press down on the riser assembly bracket and faceplate until firmly seated.

⚠️ **CAUTION:** Do not rock the riser assembly into place. Doing so may damage the contact pins within the riser slot.

6. If your Spectrum X has two SDI cards, connect the I/O cable to the new SDI card as follows:

a. Carefully slide the free end of the I/O cable underneath the SDI card in PCI riser 2, making a soft fold to the right of PCI Riser 2 (refer to the image later in this step).

   📌 **NOTE:** Do not twist or crease the cable.

b. With the release button underneath the cable end, gently insert the cable into the connector on the SDI card.

**Example:**
Replacing an SDI I/O card

31 Spectrum X Component Replacement Guide
Chapter 2: Spectrum X component replacement

Installing the system cover

The server system must be operated with the system cover in place to ensure proper cooling.

1. Place the system cover onto the chassis and slide forward until the front edge of the system cover is pressed up against the back edge of the front drive bay.
2. Hand tighten the two captive thumb screws at the back of the chassis.
3. Using a screwdriver, install the top cover screw(s).

Example:

What to do next

Follow instructions in the Spectrum System Installation Guide for reconnecting the Spectrum X to your Spectrum system and powering on the device.

Changing an I/O module name

Renaming can help you identify a MediaPort, ChannelPort, or Spectrum X module while navigating the SystemManager application.

After replacing a Spectrum X, the new device appears in SystemManager with the default name.
NOTE: For information about proper naming conventions, please refer to "About Naming Files and System Elements" in the Harmonic SystemManager User Guide.

1. From the System Diagram, click the icon for the Spectrum X that you wish to rename. The Properties page appears.

2. At the top of the page, click Change Name. The Change I/O Module Name page appears.

3. Type the new name in the field provided.

4. Click Save. The new name now appears in the System Diagram, in various page titles and fields throughout the application.

5. Repeat this procedure to rename another I/O module.

Attaching an I/O module to existing players

Use the Attach Devices feature in SystemManager to attach a replacement MediaPort, ChannelPort, or SDI I/O module to existing players.

1. From the Configuration tab, click the Player Configuration icon in the left-hand column. The Player Configuration page appears.

2. Click the icon for the Spectrum server on which the players reside. The Player List page appears.

3. Click the Edit link for any player that will use the new module.

4. Within the Track section, click the Attach Devices button. The Attach Devices page appears.

5. In the Attach column, click the check box for the device that you wish to connect.

6. Click Done. The Edit Player page appears. The ID of the new module will appear (in the following format: MIP-7XXX-NNNNN, CPT-8XXX-NNNNN, or MIP-9XXX-NNNNN) next to the attached tracks.

TIP: For help with modifying settings on either the Edit Player page or the Attach Devices page, refer to “Creating a player” in the Harmonic SystemManager User Guide.

7. Click Done to return to the Player List page.

8. Repeat this procedure for each player that will use the new module.

Activating players

You may activate Players from the Player List page or from the Edit Player page.

NOTE: Only one player can be enabled per Playout Channel at a time. If a Player cannot be enabled, an error message appears that details the reasons.
1. From the **Configuration** tab, click the **Player Configuration** button in the left-hand column. The **Player Configuration** page displays.

2. From the **Player Configuration** page, click the icon for the Spectrum server on which the players reside. The **Player List** window appears, showing a list of players that reside on the selected device and their status.

3. To activate a player from the **Player List** page, check the player(s) you wish to activate, and then select one of the following:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Activate as disabled</strong></td>
<td>Sends the player definition to the Spectrum device. This may be useful if you are using an automation system to automatically enable different players at different times.</td>
</tr>
<tr>
<td><strong>Enable</strong></td>
<td>Activates and enables the selected player(s).</td>
</tr>
</tbody>
</table>

4. To activate a player from the **Edit Player** page, do the following:

   a. For the player you wish to activate, click **Edit**. The **Edit Player** page appears.
   b. To activate the player as disabled, select **Activate as disabled**.
   c. To activate and enable the player, select **Activate and Enable**.

### Verifying functionality

Harmonic recommends that you verify functionality of the replacement equipment in your Spectrum system before using it on air.

### Replacing a power supply unit

The Spectrum X is equipped with two hot-swappable power supplies, each with an independent AC connector. If one supply fails, the load is transferred to the remaining supply without interruption to service. To take full advantage of the redundant supplies, Harmonic recommends that you use separate, isolated power sources for each AC input.

⚠️ **DANGER:** Observe all conventional ESD precautions when handling Spectrum devices and components.

🔍 **NOTE:** To allow proper airflow, both power supply compartments should always have either a power supply module or a filler module installed.

🔍 **NOTE:** In systems with dual redundant power supplies, both power supplies must be of the same type and have the same maximum output power.

Unpack the replacement component and visually inspect for any damage. If it is damaged, call Harmonic Technical Support for assistance and do not continue with this procedure.

1. Disconnect the AC power cable from the failed power supply module.
2. Using the handle, pull the power supply module from the system while pushing the green latch in the direction shown.
   After you remove the power supply, the power supply LED remains lit for a short period of time.
   
   Example:

3. Insert the power supply module into the power supply bay.
4. Push the power supply module into the bay until it locks into place.
   
   Example:
5. Connect the AC power cable to the new power supply.
Chapter 3

Spectrum X chassis replacement

Instructions for replacing a Spectrum X vary according to whether the device is operating in internal storage mode or shared storage mode.

- Replacing a Spectrum X in internal storage mode: Overview
- Replacing a Spectrum X in shared storage mode: Overview

Replacing a Spectrum X in internal storage mode: Overview

When replacing a Spectrum X in internal storage mode, complete each of the following procedures in order.

Recording your Spectrum X settings

It is important that you record all settings on the original Spectrum X before removing it.

The SystemManager uses IP addresses to uniquely identify the Spectrum X. If a Spectrum X is replaced (for example, because of unit failure), allow the new Spectrum X to assume different IP addresses from the replaced unit, if possible. This allows the SystemManager to simultaneously display both units, and allows you to move Players from the original unit to the new one, using the Move Player function.

**IMPORTANT:** If you need to replace a Spectrum video server that is configured for Polaris Play: Playlist Control, contact Harmonic Technical Support for assistance with saving all necessary settings so they can be moved to the replacement video server. Failure to save settings such as Playout Channel configuration, playlists, and schedules, as directed by Technical Support, before replacing a Spectrum video server could result in the loss of those settings.

Record the following settings:

- **Host Name**: View the Spectrum Server Properties page to identify the Host Name.
- **Network Settings**: From the Network Settings page, record all network settings for your Spectrum video server, including any Additional Routes and Ethernet Failover settings. Refer to “Configuring network settings” in the Harmonic SystemManager User Guide for information on viewing your network settings.
- **Low Priority Bandwidth Settings**: Refer to “Changing network/file system performance settings” in the Harmonic SystemManager User Guide for information on viewing the Low Priority Bandwidth Limits on the Network/Filesystem Performance Settings page.
Chapter 3: Spectrum X chassis replacement

- **Harmonic MediaGrid** Accounts: Refer to “Connecting to Harmonic MediaGrid from the Spectrum video server” in the Harmonic SystemManager User Guide for information on viewing your Harmonic MediaGrid Accounts.
- **Access Control Settings**: Refer to “Configuring Access Control settings for video servers” in the Harmonic SystemManager User Guide for information on viewing your Access Control Settings.
- **Audio Profile Groups**: Refer to “Creating an audio profile group” in the Harmonic SystemManager User Guide for information on viewing your Audio Profile Groups List.
- **Configure DDC File**: If you have installed a DDC configuration file, you will need to reinstall the same file when configuring settings on the replacement Spectrum X. Refer to "Installing a DDC file" in the Harmonic SystemManager User Guide for information on viewing your DDC file configuration.

### Powering down a Spectrum video server

Safely power down a Spectrum video server using SystemManager.

![NOTE: In certain situations, powering down one MediaDirector in an EFS configuration may cause video disruption to channels on other MediaDirector notes in the system.]

1. Click the **Configuration** tab to display the **Configuration** page and **System Diagram**.
2. Click a Spectrum video server icon to display the **Physical Configuration** page for the selected video server.
3. Click the video server’s picture to display the **Properties** page.
4. Scroll to the bottom of the **General Properties** section and click **Shutdown Spectrum Server**. A confirmation dialog appears.
5. Click **OK**.
6. Verify that the video server’s status changes to **Not Responding**.

### Replacing the chassis

For complete racking instructions, refer to the Spectrum System Installation Guide.

1. Remove power from the original Spectrum X by disconnecting each of the attached AC cords from their power sources.
2. Remove the bezel from the original Spectrum X. Refer to "Bezel replacement" in this guide.
3. Remove the drives from the original Spectrum X and install each drive in the same order (with the same corresponding drive bay) into the new Spectrum X. Refer to "Drive replacement" in this guide.
4. Disconnect all other peripheral devices and unrack the original chassis.
5. Remove the power supply units from the original Spectrum X and install them in the replacement Spectrum X. Refer to "Power supply unit replacement" fin this guide.
6. Remove the fan assemblies from the original Spectrum X and install them in the replacement Spectrum X. Refer to "Fan replacement" in this guide.
7. Remove the SDI I/O modules from the original Spectrum X and install them in the replacement Spectrum X. Refer to "SDI I/O card replacement" in this guide.

8. Rack mount the new Spectrum X according to the instructions in the Spectrum System Installation Guide.

9. Install the bezel from the original Spectrum X onto the replacement Spectrum X. Refer to "Installing the Spectrum X bezel" in this guide.

10. Using Gigabit Ethernet cables, connect the Gigabit Ethernet ports on the Spectrum X to the network switch. For detailed instructions, refer to “Connecting to your Ethernet network” in the Spectrum System Installation Guide.

   **NOTE:** If you are using a DHCP server, the DHCP server will assign new IP addresses to the public Ethernet interfaces on the Spectrum X. In SystemManager, you can configure the Spectrum X to use either DHCP or static IP addresses. After removing the original Spectrum X, you can configure the replacement to use the same IP addresses. If you do not have a DHCP server, contact Harmonic Technical Support for assistance.

11. Power up the Spectrum X by plugging in both power cables.

12. On the System Diagram page in SystemManager, verify that the new Spectrum X appears as Connected.

13. In SystemManager, view and clear any alarms that were created after the new Spectrum X was connected.

14. Determine the firmware version running on the replacement Spectrum X.

   **NOTE:** All devices in a Spectrum system should be running the same firmware version.

15. If necessary, upgrade firmware on the replacement Spectrum X to match that of the rest of your system, and then reboot the Spectrum X.

   **IMPORTANT:** Do not deactivate any players on the original Spectrum X at this point.

16. Check the status LEDs on the front panel to ensure that the system is operating normally.

**Starting the file system**

Use this procedure to start an existing File System that has been previously initialized. The procedure is typically used after performing maintenance on the File System, or when starting a File System in configurations with more than one MediaDirector.

**IMPORTANT:** After replacing a Spectrum server, the File System Status field might show Started or Not Started (depending on the software version). Even if the status shows Started, you must stop the File System and then start it again to ensure that the correct settings take effect.

1. From the Configuration tab, click the Disk Utilities icon in the lefthand column. The Spectrum - Disk Utilities page displays all video servers on the network and the status of their File Systems.

2. Click on the name of the Spectrum server with the File System you wish to start.
The Disk Utilities page for the Spectrum server appears. There are two columns displayed, the Physical View and Logical View.

3. At the top of the Logical View column, click the link to the File System name. The Filesystem Utilities page displays.

4. If you are replacing a Spectrum server and the file system Status shows Started, click Stop FS. The button changes to Start FS.

5. Click Start FS.

   **CAUTION:** Do not click “Initialize FS”. This will wipe out the entire File System.

   The Start Filesystem page appears.

6. Ensure that the first option, Use NVRAM Journaling for this filesystem, is checked.

   **NOTE:** In most cases, you should not need to change the options from the default selections.

7. Click the Start button.

   The Filesystem utilities page appears, where the Mode field should indicate Read/Write, the Sharing with other MediaDirectors field should indicate On (if it does not, the MediaDirector needs to be rebooted), and the Mountpoint field should indicate /fs0.

   For a MediaDirector in EFS configuration only: the Expansion Ethernet LED on the front panel should indicate that the EFS is working.

8. From the Configuration tab, click the Disk Utilities icon and verify that the Spectrum X is shown as Started and Shared.

**What to do next**

**NOTE:** If replacing a MediaDirector: It is recommended that every MediaDirector sharing a File System (EFS) be rebooted after one MediaDirector has been replaced. This ensures that they are all in sync.

**Moving players from one Spectrum server to another**

This feature is useful when a MediaPort is “moved” between Spectrum servers, and when Spectrum servers need to be serviced. Players may be moved from Spectrum servers that are not responding.

**NOTE:** In this context, “moved” means physically removing a MediaPort or Spectrum X from the source Spectrum server's 1394 bus by disconnecting its IEEE 1394 cable, and then reconnecting its IEEE 1394 cable to the destination Spectrum server.

1. From the Configuration tab in SystemManager, click the Player Configuration icon on the left-hand column.

   If you have replaced a Spectrum server, the page should show 0 players configured for that server.

2. Select the destination Spectrum server.

   The Player List page appears.

3. On the Player List page, under Move Players from another media server, use the dropdown box to select the host of the original Spectrum server, which has the players you wish to move.
Replacing a Spectrum X in internal storage mode: Overview

4. Click **Select Players**. The **Select Players** page appears, showing a list of those players that reside on the Spectrum server you chose.

5. Select the players that you wish to move by clicking the appropriate check boxes. Optionally, click **Select all Players**.

6. Click **Move** to perform the move function between Spectrum servers. The selected players will disappear from the list.

7. Click **Done** to complete the move.

8. Harmonic recommends you verify that the players are usable by recording or playing material using those players on their new Spectrum server.

Removing a Spectrum X from SystemManager

Remove a device that is no longer part of your Spectrum system.

1. From the **Diagnostics** tab, click the **Remove Device** icon in the left-hand column. The **Remove Device** page appears.

2. If the device you are removing is not responsive, find the device in the **Not Responding Devices** section, select it, and then click **Remove Not Responding Devices**. The device is removed (it has also been removed from the **System Diagram**), and this completes the procedure.

3. If you are removing a device that is responsive, follow these steps:
   a. Click **Stop Monitoring**. Once the “Current state of Device Monitoring” changes to **Not monitoring**, continue to the next step.
      
      ![NOTE: This may take a few minutes depending on the number of devices in your system.](image)
   
   b. Select one or more devices from one of the sections on the page.
   c. Click **Remove** at the bottom of the section.
   d. Click **OK** to confirm.
      
      After a brief pause, a message appears indicating that the device has been removed (it has also been removed from the System Diagram).
   e. Click **Start Monitoring** to resume device monitoring, and then ensure that the “Current state of Device Monitoring” field changes to **monitoring**.
      
      ![NOTE: Device status may show Not Responding for a brief interval after monitoring has been turned back on.](image)

Configuring the Spectrum X

After replacing a Spectrum video server chassis or boot drive, you must configure the server settings. Refer to your record of the original settings in order to complete this procedure.

1. Configure network settings. Refer to “Configuring network settings” in the **Harmonic SystemManager User Guide** for information on configuring network settings including additional routes and Ethernet Failover settings.
2. Configure your Harmonic MediaGrid accounts. Refer to “Connecting to a Harmonic MediaGrid from the Spectrum video server” in the Harmonic SystemManager User Guide for information on configuring your Harmonic MediaGrid Accounts.

4. If you had previously modified the Low Priority Bandwidth Settings, then configure these settings to match your original settings. Refer to “Changing Network/File System Performance settings” in the Harmonic SystemManager User Guide for information on configuring Low Priority Bandwidth Limits.

5. If you had modified the contents of the filetypes.conf file, configure these settings to match your original settings. For information on editing the filetypes.conf file, refer to “Editing the Filetypes.conf File” in the Harmonic SystemManager User Guide.

6. If you had previously configured audio profile groups, configure new audio profile groups to match your original settings. For instructions, refer to “Creating an audio profile group” in the Harmonic SystemManager User Guide.

7. If you had previously installed a DDC configuration file, install the same DDC file. Refer to "Installing a DDC file" in the Harmonic SystemManager User Guide for instructions.

8. Reboot the Spectrum X according to the instructions in “Rebooting the Spectrum video server” in the Harmonic SystemManager User Guide. Once the Spectrum X has rebooted, verify that all changes are correct.

Verifying functionality

Harmonic recommends that you verify functionality of the replacement equipment in your Spectrum system before using it on air.

Replacing a Spectrum X in shared storage mode: Overview

When replacing a Spectrum X in shared storage mode, complete each of the following procedures in order.

Deactivating players

Deactivate a player when you do not want an automation system to be able to automatically enable the player for play and record.

NOTE: In SystemManager, a MediaPort 7000 series appears as two separate MIP-7XXX or CPT-8XXX devices, and a Spectrum X appears as two separate MIP-9XXX devices.

1. Click the Player Configuration button in the left-hand column.
   The Player Configuration page appears.

2. Click the icon for the Spectrum server on which the players reside.
   The Player List page appears.

3. Check the box for each Player that you wish to deactivate.
NOTE: If replacing a Spectrum server or I/O module, be sure to select all active Players associated with the server or module.

4. Click Deactivate Selected.

Removing a Spectrum X from SystemManager

Remove a device that is no longer part of your Spectrum system.

1. From the Diagnostics tab, click the Remove Device icon in the left-hand column. The Remove Device page appears.

2. If the device you are removing is not responsive, find the device in the Not Responding Devices section, select it, and then click Remove Not Responding Devices. The device is removed (it has also been removed from the System Diagram), and this completes the procedure.

3. If you are removing a device that is responsive, follow these steps:
   a. Click Stop Monitoring. Once the “Current state of Device Monitoring” changes to Not monitoring, continue to the next step.
      NOTE: This may take a few minutes depending on the number of devices in your system.
   b. Select one or more devices from one of the sections on the page.
   c. Click Remove at the bottom of the section.
   d. Click OK to confirm. After a brief pause, a message appears indicating that the device has been removed (it has also been removed from the System Diagram).
   e. Click Start Monitoring to resume device monitoring, and then ensure that the “Current state of Device Monitoring” field changes to monitoring.
      NOTE: Device status may show Not Responding for a brief interval after monitoring has been turned back on.

Powering down a Spectrum video server

Safely power down a Spectrum video server using SystemManager.

NOTE: In certain situations, powering down one MediaDirector in an EFS configuration may cause video disruption to channels on other MediaDirector notes in the system.

1. Click the Configuration tab to display the Configuration page and System Diagram.

2. Click a Spectrum video server icon to display the Physical Configuration page for the selected video server.

3. Click the video server's picture to display the Properties page.

5. Click OK.
6. Verify that the video server's status changes to Not Responding.

Replacing the chassis

When replacing the chassis, transfer all replaceable components from the original Spectrum X to the new Spectrum X. Refer to the Spectrum System Installation Guide for complete racking instructions.

Before you begin

Make sure the original Spectrum X is powered down.

1. Disconnect any cables from the original Spectrum X.
2. Remove the bezel. Refer to "Bezel replacement" in this guide for instructions.
3. Remove the power supplies from the original chassis and install them in the replacement chassis. Refer to "Power supply unit replacement" for instructions.
4. Remove the Spectrum X from the rack.
5. Remove the fan assemblies from the original chassis and install them in the new chassis. Refer to "Fan replacement" in this guide for instructions.
6. Remove the SDI I/O cards from the original chassis and install them in the replacement chassis. Refer to "SDI I/O card replacement" in this guide for instructions.
7. Rack mount the replacement Spectrum X. Refer to "Rack mounting instructions" in the Spectrum System Installation Guide.
8. Install the bezel on the replacement chassis. Refer to "Bezel replacement" in this guide for instructions.

   IMPORTANT: Before connecting a device to SystemManager, make sure that device monitoring is on. To check device monitoring, click the Home tab to open the Options page, and view the “Current state of Device Monitoring” field at the top of the page. If the “Current state of Device Monitoring” field displays NOT monitoring, then click Start Monitoring and wait for the state to change to monitoring before continuing to connect the device. This may take a few minutes depending on the number of devices in your system. Also, note the status of devices may show Not Responding for a brief interval after monitoring has been turned on.

10. Power up the Spectrum X by plugging in both power cables.
11. On the System Diagram page in SystemManager, verify that the new Spectrum X appears as Connected.
12. In SystemManager, view and clear any alarms that were created after the new Spectrum X was connected.
   The replacement Spectrum X will appear in SystemManager with the default name. For instructions on changing the name, refer to "Changing an I/O module name" in this guide.
13. Determine the firmware version running on the replacement Spectrum X.

   NOTE: All devices in a Spectrum system should be running the same firmware version.
14. If necessary, upgrade firmware on the replacement Spectrum X to match that of the rest of your system, and then reboot the Spectrum X.

15. Check the status LEDs on the front panel to ensure that the system is operating normally.

What to do next
Activate players on the replacement Spectrum X.

Changing an I/O module name

Renaming can help you identify a MediaPort, ChannelPort, or Spectrum X module while navigating the SystemManager application.

After replacing a Spectrum X, the new device appears in SystemManager with the default name.

NOTE: For information about proper naming conventions, please refer to "About Naming Files and System Elements" in the Harmonic SystemManager User Guide.

1. From the System Diagram, click the icon for the Spectrum X that you wish to rename. The Properties page appears.

2. At the top of the page, click Change Name. The Change I/O Module Name page appears.

3. Type the new name in the field provided.

4. Click Save. The new name now appears in the System Diagram, in various page titles and fields throughout the application.

5. Repeat this procedure to rename another I/O module.

Activating players

You may activate Players from the Player List page or from the Edit Player page.

NOTE: Only one player can be enabled per Playout Channel at a time. If a Player cannot be enabled, an error message appears that details the reasons.

1. From the Configuration tab, click the Player Configuration button in the left-hand column. The Player Configuration page displays.

2. From the Player Configuration page, click the icon for the Spectrum server on which the players reside. The Player List window appears, showing a list of players that reside on the selected device and their status.

3. To activate a player from the Player List page, check the player(s) you wish to activate, and then select one of the following:
### Option Description

**Activate as disabled** Sends the player definition to the Spectrum device. This may be useful if you are using an automation system to automatically enable different players at different times.

**Enable** Activates and enables the selected player(s).

4. To activate a player from the **Edit Player** page, do the following:
   
a. For the player you wish to activate, click **Edit**.
   
   The **Edit Player** page appears.
   
b. To activate the player as disabled, select **Activate as disabled**.
   
c. To activate and enable the player, select **Activate and Enable**.

### Verifying functionality

Harmonic recommends that you verify functionality of the replacement equipment in your Spectrum system before using it on air.

Important safety instructions

Review important safety guidelines for operators and service personnel.

Specific warnings and cautions are found throughout the guide where they apply, but may not appear here. Please read and follow the important safety information, noting especially those instructions related to risk of fire, electric shock or injury to persons. You must adhere to the guidelines in this document to ensure and maintain compliance with existing product certifications and approvals. In this document, we use “product,” "equipment," and “unit” interchangeably.

This equipment generates, uses, and can radiate radio frequency energy. It may cause harmful interference to radio communications if it is not installed and used in accordance with the instructions in this manual. Operation of this equipment in a residential area is likely to cause harmful interference. If this occurs, the user will be required to correct the interference at his or her own expense.

In event of conflict between the information in this document and information provided with the product or on our website for a particular product, this product documentation takes precedence.
Appendix B: Safety and regulatory compliance information

- Safety symbols (English)
- Symboles de sécurité (français)
- Sicherheit symbole (Deutsch)

Safety symbols & safety, warning & caution instructions

Understand the meaning of different safety symbols.

To avoid personal injury or property damage, before you begin installing or replacing the product, read, observe, and adhere to all the following safety instructions and information. Harmonic products and/or product packaging may be marked with the safety symbols used throughout this document, when it is necessary to alert operators, users, and service providers to pertinent safety instructions in the manuals.

| ![Warning](image) | **Installing or replacing the product unit warning**  
- Only trained and qualified service personnel should be allowed to install, replace, or service this unit (refer AS/NZS 3260 Clause 1.2.14.3 Service Personnel).  
- Read the installation instructions before connecting the system to the power source.  
- When installing or replacing the unit, always make the ground connection first and disconnect it last.  
- Installation of the unit must comply with local and national electrical codes.  
- This unit is intended for installation in restricted access areas. A restricted access area can be accessed only through the use of special tool, lock and key or other means of security.  
- Use only specified replacement parts.  
- Do not use this unit in or near water. Disconnect all AC power before installing any options or servicing the unit unless instructed to do so by this manual. |

| ![Warning](image) | **Rack mount warning**  
To prevent bodily injury when mounting or servicing this unit in a rack, special precautions must be taken to ensure your safety and stability of system:  
- Conform to local occupational health and safety requirements when moving and lifting the equipment.  
- Ensure that mounting of the unit by mechanical loading tools should not induce hazardous conditions.  
- To avoid risk of potential electric shock, a proper safety ground must be implemented for the rack and each piece of equipment installed on it. |

| Warning | **Chassis warning**  
- Before connecting or disconnecting ground or power wires to the chassis, ensure that power is removed from the DC circuit.  
- To prevent personal injury or damage to the chassis, lift the unit only by using handles that are an integral part of the chassis, or by holding the chassis underneath its lower edge.  
- Any instructions in this guide that require opening the chassis or removing a board should be performed by qualified service personnel only.  
- Slots and openings in the chassis are provided for ventilation. Do not block them. Leave the back of the frame clear for air exhaust cooling and to allow room for cabling - a minimum of 6 inches (15.24 cm) of clearance is recommended. |
| Warning | **Electric shock warning**  
- This unit might have more than one power cord. To reduce the risk of electric shock, disconnect the two power supply cords before servicing the unit.  
- Before working on a chassis or working near power supplies, unplug the power cord on AC units.  
- Do not work on the system or connect or disconnect cables during periods of lightning activity.  
- This unit is grounded through the power cord grounding conductor. To avoid electric shock, plug the power cord into a properly wired receptacle before connecting the product input or outputs.  
- Route power cords and other cables so that they are not likely to be damaged. Disconnect power input to unit before cleaning. Do not use liquid or aerosol cleaners; use only a damp cloth to clean chassis.  
- Dangerous voltages exist at several points in this product. To avoid personal injury, do not touch exposed connections and components while power is on. Do not insert anything into either of the system's two power supply cavities with power connected.  
- Never install an AC power module and a DC power module in the same chassis.  
- Do not wear hand jewelry or watch when troubleshooting high current circuits, such as the power supplies.  
- To avoid fire hazard, use only the specified correct type voltage and current ratings as referenced in the appropriate parts list for this unit. Always refer fuse replacement to qualified service personnel.  
- This unit relies on the building's installation for short-circuit (overcurrent) protection. Ensure that a fuse or circuit breaker no larger than 120 VAC, 15A U.S. (240 VAC, 10A international) is used on the phase conductors (all current-carrying conductors)  
- To avoid electrocution ensure that the rack has been correctly grounded before switching on the unit. When removing the unit remove the grounding connection only after the unit is switched off and unplugged. |

| ![Avertissement](image) | **Installation ou remplacement de l'unité de produit avertissement**  
- Il est vivement recommandé de confier l'installation, le remplacement et la maintenance de ces équipements à des personnels qualifiés et expérimentés. (voir AS / NZS 3260 article 1.2.14.3 du personnel de service).  
- Avant de brancher le système sur la source d'alimentation, consulter les directives d'installation.  
- Lors de l'installation ou le remplacement de l'appareil, la mise à la terre doit toujours être connectée en premier et déconnectée en dernier.  
- L'équipement doit être installé conformément aux normes électriques nationales et locales.  
- Cet appareil est à installer dans des zones d'accès réservé. Ces dernières sont des zones auxquelles seul le personnel de service peut accéder en utilisant un outil spécial, un mécanisme de verrouillage et une clé, ou tout autre moyen de sécurité.  
- Utilisez uniquement des pièces de rechange spécifiées.  
- Ne pas utiliser ce produit dans l'eau ni à proximité de l'eau. Débrancher toutes les prises d'alimentation secteur avant d'installer des options ou d'effectuer l'entretien de l'unité, à moins d'instructions contraires dans le présent manuel. |
| ![Avertissement](image) | **Rack monture avertissement**  
Pour éviter les blessures corporelles lors du montage ou l'entretien de cet appareil dans un rack, des précautions particulières doivent être prises pour assurer votre sécurité et la stabilité du système:  
- Conformez-vous aux exigences de médecine du travail et de sécurité lorsque vous déplacez et soulevez le matériel.  
- Assurez-vous que le montage de l'appareil par des outils de chargement mécaniques ne doit pas induire des conditions dangereuses.  
- Pour éviter tout risque d'électrocution, le rack et chaque élément de l'équipement installé dans le rack doivent être correctement reliés à la terre. |
| ![Avertissement](image) | **Châssis avertissement**  
- Avant de connecter ou de déconnecter les câbles d'alimentation (pôles et terre) du châssis, vérifiez que le circuit de courant continu est hors tension.  
- Pour éviter toute blessure ou des dommages au châssis, soulevez l'unité uniquement par les poignées du châssis lui-même ou en portant celui-ci par le bord inférieur.  
- Toutes les opérations du présent guide nécessitant l'ouverture du châssis ou le retrait d'une carte doivent être uniquement effectuées par du personnel d'entretien qualifié.  
- Le châssis est muni de fentes et d'ouvertures d'aération. Ne pas les bloquer. Dégager l'arrière du cadre pour permettre le refroidissement de l'évacuation d'air et laisser de la place au câblage; un dégagement d'au moins 15.24 cm (6 po) est recommandé. |

<tbody>
<tr>
<td><img src="image" alt="Mark" /></td>
<td>- Il est possible que cette unité soit munie de plusieurs cordons d'alimentation. Pour éviter les risques d'électrocution, débrancher les deux cordons d'alimentation avant de réparer l'unité.</td>
</tr>
<tr>
<td></td>
<td>- Avant de travailler sur un châssis ou à proximité d'une alimentation électrique, débrancher le cordon d'alimentation des unités en courant alternatif.</td>
</tr>
<tr>
<td></td>
<td>- Ne pas travailler sur le système ni brancher ou débrancher les câbles pendant un orage.</td>
</tr>
<tr>
<td></td>
<td>- Ce unité est mis à la terre par le conducteur de protection intégré au cordon d'alimentation. Pour éviter les chocs électriques, brancher le cordon d'alimentation dans une prise correctement câblée avant de raccorder les entrées ou sorties du unité.</td>
</tr>
<tr>
<td></td>
<td>- Installer les cordons d'alimentation et autres câbles de sorte qu'ils ne risquent pas d'être endommagés. Couper l'alimentation avant nettoyage. Ne pas utiliser de nettoyant liquide ou en aérosol; utiliser seulement un linge humide.</td>
</tr>
<tr>
<td></td>
<td>- Des courants électriques dangereux circulent dans cet appareil. Afin d'éviter les blessures, ne pas toucher les connexions et composants exposés lorsque l'appareil est sous tension. Ne rien insérer dans l'une ou l'autre des cavités des prises de courant du système lorsque l'appareil est sous tension.</td>
</tr>
<tr>
<td></td>
<td>- N'installez jamais un module d'alimentation AC et un module d'alimentation DC dans le même châssis.</td>
</tr>
<tr>
<td></td>
<td>- Ne pas porter de bijoux aux mains ni de montre durant le dépannage des circuits à haute tension, comme les transformateurs.</td>
</tr>
<tr>
<td></td>
<td>- Pour prévenir les risques d'incendie, n'utiliser que le type, la tension et le courant nominal spécifiés dans la nomenclature des pièces de ce unité. Toujours confier le remplacement des fusibles à du personnel d'entretien qualifié.</td>
</tr>
<tr>
<td></td>
<td>- Pour ce qui est de la protection contre les courts-circuits (surtension), ce produit dépend de l'installation électrique du local. Vérifier qu'un fusible ou qu'un disjoncteur de 120 V alt., 15 A U.S. maximum (240 V alt., 10 A international) est utilisé sur les conducteurs de phase (conducteurs de charge).</td>
</tr>
<tr>
<td></td>
<td>- Pour éviter l'électrocution, assurez-vous que le rack a bien été mis à la terre avant de mettre l'unité en marche. Lors du retrait de l'unité, retirer le raccordement de terre seulement après avoir mis l'unité à l'arrêt et l'avoir débranchée.</td>
</tr>
</tbody>
</table>
### Les décharges électrostatiques (ESD) attention
- Respecter systématiquement les precautions relatives aux charges électrostatiques durant la manipulation de cet unité.
- Portez toujours un poignet ou une cheville bracelet antistatique préventive lors de la manipulation des composants électroniques. Branchez une extrémité de la sangle à une prise ESD ou d'un composant métallique non peinte sur le système.
- Manipulez les cartes en les faces avant et les bords seulement; éviter de toucher la carte de circuit imprimé et les broches du connecteur.
- Placer un composant retiré sur une surface antistatique ou dans un sac de protection statique.
- Éviter tout contact entre les cartes et les vêtements.
- Vérifier périodiquement la valeur de résistance de la sangle antistatique. Valeur recommandée est comprise entre 1 et 10 mégao-ohms (Mohms).

### Rayonnement laser attention
Rayonnement laser invisible peut être émis à partir de fibres ou les connecteurs débranchés. Ne pas regarder en faisceaux ou regarder directement avec des instruments optiques. Ne jamais faire fonctionner une unité en cas de bris d'une fibre ou de séparation d'un connecteur de fibre.

### Batterie au lithium manipulation instructions de sécurité

### Attention
- Il y a danger d'explosion si la batterie est remplacée de manière incorrecte ou par une batterie de type incorrect.
- Mettre au rebut les batteries usagées conformément aux instructions du fabricant.
- Les batteries des produits Harmonic ne peuvent pas être réparées ni entretenues par l'utilisateur. Ne confier l'entretien des batteries remplaçables qu'à du personnel compétent de Harmonic.

---

### Sicherheit Symbole und Sicherheit, Achtung & Vorsicht Anleitung
Verstehen Sie die Bedeutung der verschiedenen Sicherheitssymbole.
Um Verletzungen oder Sachschäden zu vermeiden, bevor Sie mit der Installation oder Austausch des Produkts zu beginnen, zu lesen, zu beobachten, und sich an all den folgenden Sicherheitshinweise und Informationen. Harmonic Produkte und / oder Produktverpackungen können mit den Sicherheitssymbole.
in diesem Dokument verwendet werden, markiert, wenn es notwendig ist für die Betreiber, Anwender und Dienstleister, um relevante Sicherheitsanweisungen in den Handbüchern zu alarmieren.

### Elektroschock-Warnung

- Diese Einheit hat möglicherweise mehr als ein Netzkabel. Zur Verringerung der Stromschlaggefahr trennen Sie beide Netzgerätekabel ab, bevor Sie die Einheit warten.
- Vor der Arbeit an einem Chassis für Arbeiten in der Nähe Stromversorgung, ziehen Sie das Netzkabel mit Netzeinheiten.
- Arbeiten Sie nicht am System und schließen Sie keine Kabel an bzw. trennen Sie keine ab, wenn es gewittert.
- Dieses Gerät ist über das Netzkabel Erdungsleiter geerdet. Um einen Stromschlag zu vermeiden, stecken Sie das Netzkabel in eine Steckdose richtig verdrahtet, bevor Sie das Produkt Eingang oder Ausgänge.
- Verlegen Sie Netzkabel und andere Kabel, so dass sie wahrscheinlich nicht beschädigt werden. Trennen Eingangsleistung Einheit vor der Reinigung. Verwenden Sie keine flüssigen oder Aerosolreiniger; nur mit einem feuchten Tuch zu reinigen Chassis.
- Ein Wechselstrommodul und ein Gleichstrommodul dürfen niemals in demselben Chassis installiert werden.
- Tragen Sie keine Hand Schmuck oder schauen Sie bei der Fehlersuche hohen Stromkreise, wie beispielsweise die Stromversorgung.
- Um die Brandgefahr zu vermeiden, verwenden Sie nur den genannten richtige Art von Spannung und Strom Ratings als in der entsprechenden Stückliste für diese Einheit verwiesen. Beziehen sich immer auf Austausch der Sicherung von qualifiziertem Fachpersonal.
- Dieses Produkt ist darauf angewiesen, daß im Gebäude ein Kurzschluß- bzw. Überstromschutz installiert ist. Stellen Sie sicher, daß eine Sicherung oder ein Unterbrecher von nicht mehr als 240 V Wechselstrom, 10 A (bzw. in den USA 120 V Wechselstrom, 15 A) an den Phasenleitern (allen Stromführenden Leitern) verwendet wird.
- Um einen Stromschlag zu vermeiden, sicherzustellen, dass die Zahnstange wurde korrekt vor dem Einschalten des Gerätes geerdet. Beim Entfernen der Einheit entfernen Sie die Masseverbindung nur, nachdem das Gerät ausgeschaltet und der Netzstecker gezogen.

| Vorsich | **Elektrostatische Entladung (ESD) Vorsicht**  
- Folgen Sie statische vorsorglich zu jeder Zeit beim Umgang mit diesem Gerät.  
- Hand Karten nur durch die Faceplates und Kanten; Berühren Sie die bedruckte Leiterplatte und Steckerstifte.  
- Legen Sie alle entfernten Komponenten auf eine antistatische Oberfläche oder in einem Statik-Beutel.  
- Kontakt zwischen den Karten und Kleidung vermeiden.  
- Den Widerstandswert der gegen statische Gurt in regelmäßigen Abständen überprüfen. Empfohlener Wert ist zwischen 1 und 10 Mega-Ohm (MOhm). |
| Warnung | **Laserstrahlungen Warnung.**  
| Warnung | **Lithium-Batterie Handhabung Sicherheitshinweise**  
| Vorsich |  
- Bei Einsetzen einer falschen Batterie besteht Explosionsgefahr  
- Entsorgen Sie die benutzten Batterien nach den Anweisungen des Herstellers.  
- Es gibt keine zu wartenden Akkus im Harmonic Produkte. Siehe Harmonic qualifiziertes Personal, um die austauschbare Batterien Service |
Site preparation instructions
Make the equipment site ready for installation and use.

**NOTE:** Only trained and qualified service personnel (as defined in IEC 60950 and AS/NZS 3260) should install, replace, or service the equipment. Install the system in accordance with the U.S. National Electric Code if you are in the United States.

1. Preparing & choosing a site for installation.
   - To ensure normal system operation, plan your site configuration and prepare the site before installation.
   - Install the unit in a restricted access area.
   - Choose a site with a dry, clean, well-ventilated and air-conditioned area.
   - Choose a site that maintains an ambient temperature of 32 to 104°F (0 to 40°C).

2. Creating a safe environment.
   - Connect AC-powered systems to grounded power outlets or as per local regulations.
   - Do not move or ship equipment unless it is correctly packed in its original wrapping and shipping containers.
   - Only allow Harmonic trained personnel to undertake equipment service and maintenance. Do not permit unqualified personnel to operate the unit.
   - Wear ear protection when working near an NSG Pro platform for a longer period of time.

3. Rack mounting the unit.
   - Install the system in an open rack whenever possible. If installation in an enclosed rack is unavoidable, ensure that the rack has adequate ventilation.
   - Reliable earthing of rack-mounted equipment should be maintained. Particular attention should be given to supply connections other than direct connections to the branch circuit (e.g. use of power strips). This unit should be mounted at the bottom of the rack if it is the only unit in the rack.
   - When mounting this unit in the partially filled rack, load the rack from the bottom to the top with the heaviest component at the bottom of the rack.
   - If the rack is provided with stabilizing devices, install the stabilizers before mounting or servicing the unit in the rack.
   - The rack must be anchored to an immovable support to prevent it from tipping when the unit is mounted on it. The rack must be installed according to the rack manufacturer’s instructions.
   - Disconnect all power and external cables before lifting the unit. Depending on the weight of the unit, more than one person might be required to lift it.

4. Power considerations

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
</table>
| AC power | - Adding to the system a UPS (Uninterrupted Power Supply) and an AVR (Automated Voltage Regulator) is highly recommended.  
- Installing the main power supply by a qualified electrician, according to power authority regulations. Make sure all powering are wired with an earth leakage, according to local regulations. |
### Product end-of-life disassembly instructions

Review guidance on responsible product disposal and recycling of a product.

For disassembly instructions, please call the technical support in order to remove components requiring selective treatment, as defined by the EU WEEE Directive (2012/19/EU). See Harmonic Technical Assistance Center contact information on page 47.

1. Disassemble equipment at a dedicated area only, gather the needed tools for disassembly.
2. Remove covers, housing, etc.
3. Remove and separate sub-assemblies (i.e. cables, metals, displays, fans, etc.).
4. Separate hazardous materials from the remainder of the material.

#### Option | Description
--- | ---
- | It is recommended to install the encoder within 1.5m (approximately 5 feet) from an easily accessible grounded AC outlet.
- | When the encoder is rack-mounted, ensure that the rack is correctly grounded.
- **DC power**
  - Ensure a suitable over-current device is in-line between the equipment and the power source.
  - Connect DC-input power supplies only to a DC power source that complies with the safety extra-low voltage (SELV) requirements in the UL60950-1, CAN/CSA-C22.2 No. 60950-1-03, AS/NZS 60950-1, EN/IEC 60825-1, 21 CFR 1040, EN 60950-1, and IEC 60950-1 standards.
  - Ensure that power is removed from the DC circuit before installing or removing power supplies.

#### 5. Handling Fiber Channel cables
- Always read and comply with the handling instructions on the shipping container.
- Follow all ESD precautions and approved fiber cleaning procedures.
- The fiber is made of a very pure, expensive glass and should be treated with great care. Handle fibers only in areas that are very clean and do not contain sharp objects.
- Wear finger cots or gloves as dirt and oils can damage the fiber and contaminate connectors.
- Do not allow kinks or knots to develop in the fiber. If tangles occur, carefully work out the tangles avoiding pulling or bending the fiber beyond its bend radius.
- Always use the correct tools for stripping and cleaving the fiber. It will save time and reduce breakage caused by scratches.
- If you must secure a bundle of fiber cables together, avoid plastic and metal tie wraps; secure with Velcro instead.

#### 6. Disposing of the unit
- Dispose of the unit and its components (including batteries) as specified by all national laws and regulations.
Appendix B: Safety and regulatory compliance information

1. Sort hazardous materials into their different types (i.e., batteries, hazardous liquids, hazardous solids, fiberglass, etc.).
2. Proceed with hazardous waste management processes only.

5. Identify re-usable materials/sub-assemblies and separate these from the rest of the material.

6. Identify and separate recyclable materials as per below examples:
   a. Scrap material to be sent to smelter(s).
   b. E-waste such as displays, CPU’s, cables and wires, hard drives, keyboards, etc.
   c. Metals such as steel, brass, and aluminum.
   d. Plastics such as fan casings, housings, covers, etc.
   e. Fiber optics and plastic tubing not containing electrical or data wiring.

### Safety rules (English)

Observe the rules for safe product disposal and recycling.

Recycler personnel are to wear personal protective equipment including proper eye protection, proper hand protection, and proper breathing protection if needed.

Recycler personnel shall be experienced with using the proper tools required for disassembling equipment. Untrained personnel shall not disassemble Harmonic products. Unfamiliarity with tools can cause damage and injury.

### Règles de sécurité

Respecter les règles d'élimination du produit en toute sécurité et le recyclage.

Le personnel du recycleur doit porter de l'équipement de protection individuelle, y compris des lunettes, des gants et un masque de protection appropriés au besoin.

Le personnel du recycleur doit avoir de l'expérience des outils de démontage de l'appareil. Les produits Harmonic ne doivent pas être démontés par du personnel non qualifié. Une mauvaise connaissance des outils peut causer des dommages et des blessures.

### EU manufacturer’s Declaration of Conformity

Learn more about Harmonic product regulatory compliance.

This equipment is in compliance with the essential requirements and other provisions of Directives 73/23/EEC and 89/336/EEC as amended by Directive 93/68/EEC.

**NOTE:** For specifics, about which standards have been applied, refer to the Declaration of Conformity of the product on Harmonic website at Product Regulatory Compliance or contact Harmonic Compliance Team at regulatory.compliance@harmonicinc.com.
Electromagnetic compatibility notices – Class A

Learn more about Harmonic product electromagnetic compatibility.

1. FCC verification statement (USA)

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case users will be required to correct the interference at their own expense.

Connections between the Harmonic equipment and other equipment must be made in a manner that is consistent with maintaining compliance with FCC radio frequency emission limits. Modifications to this equipment not expressly approved by Harmonic may void the authority granted to the user by the FCC to operate this equipment and you may be required to correct any interference to radio or television communications at your own expense.

2. ICES–003 statement (Canada)

**English:** This Class A digital apparatus complies with Canadian ICES-003.

**French:** Cet appareil numérique de la classe A est conforme à la norme NMB-003 du Canada.

3. CE Declaration of Conformity (European Union)

This product has been tested in accordance too, and complies with the Low Voltage Directive (2014/30/EU) and EMC Directive (2014/35/EU). The product has been marked with the CE Mark to illustrate its compliance.

4. VCCI Class A warning (Japan)

English translation of the notice above: This is a Class A product based on the standard of the Voluntary Control Council for Interference (VCCI) from Information Technology Equipment. If this equipment is used in a domestic environment, it may cause radio interference. When such trouble occurs, the user may be required to take corrective actions.

5. BSMI EMC notice (Taiwan)
Appendix B: Safety and regulatory compliance information

警告使用者：
這是一類資訊產品，在居住的環境中使用時，可能會造成射頻干擾，在這種情況下，使用者會被要求採取某些適當的對策

English translation of the notice above: This is a Class A Information Product, when used in residential environment, it may cause radio frequency interference, under such circumstances, the user may be requested to take appropriate counter measures.

6. Class A warning (Korea)

주의 A급 기기 이 기기는 업무용으로 전자파 적합 등록을 한 기기이 오니 판매자 또는 사용자는 이 점을 주의하시기 바라며 만약 잘못 판매 또는 구입하였을 때에는 가정용으로 교환하시기 바랍니다.

English translation of the notice above: This is a Class A device and is registered for EMC requirements for industrial use. The seller or buyer should be aware of this. If this was sold or purchased by mistake, it should be replaced with a residential-use type.

7. Class A statement (China)

中华人民共和国“A类”警告声明

声明
此为A级产品，在居住环境中，该产品可能会造成无线电干扰。在这种情况下，可能需要用户对其干扰采取切实可行的措施。

English translation of the notice above: When labeled with the CCC marking, the product meets the applicable safety and EMC requirements for China. This is a Class A product. In a domestic environment this product may cause radio interference, in which case the user may be required to take adequate measures.

8. Class A warning – CISPR 22 (AS/NZS)

Warning (English) This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

Attention (French) Il s'agit d'un produit de classe A. Dans un environnement local, ce produit peut entraîner des perturbations radioélectriques, auquel cas l'utilisateur devra éventuellement prendre des mesures adéquates.

Product environmental compliance

Harmonic manufactures high quality and innovative IT and telecommunications equipment, video delivery infrastructure solutions and services for its customers worldwide.

Harmonic is committed to providing our customers with safe and environmentally friendly products that are compliant with all relevant regulations, customer specifications, and environmental legislation, including the directives described below.

EU RoHS

In July 2006, the European Union’s (EU) Directive (2002/95/EC) on the Restriction of the use of certain Hazardous Substances (RoHS) in Electrical and Electronic Equipment (EEE) went into effect, and in July, 2011, the European Union’s RoHS Recast Directive (2011/65/EU) also known as RoHS II entered into force.

Harmonic understands the environmental risks associated with the substances covered by the RoHS Directive and has committed to eliminating or reducing the use of these, as well as other environmentally sensitive substances in our products. Harmonic also continues to comply with the requirements under RoHS II.

For more information, please visit EU RoHS directive page at official EU website.

Restricted substance statement

Harmonic products contain less than the permitted limits for the six restricted substances except where exemptions published in the RoHS2 Directive are applicable. This statement is based on vendor-supplied analysis or material certifications, and/or lab test results of the component raw materials used in the manufacture of Harmonic products.

Table B-1: Restricted substances

Appendix B: Safety and regulatory compliance information

EU REACH

Harmonic supports the basic aim of REACH in improving the protection of human health and environment through the better and earlier identification of intrinsic properties of chemical substances. Harmonic products are considered “articles” under REACH; therefore, we are required to provide recipients of our products with information on Substance of Very High Concern (SVHC) present in concentration above 0.1% (w/w).

Substances in our products are not intended to be released under normal or reasonably foreseeable conditions of use; therefore, the registration requirement in REACH Article 7(1) does not apply to our products.

For more information, please visit REACH regulation page at official EU website.

http://ec.europa.eu/environment/chemicals/reach/reach_en.htm

China RoHS

Review China’s Restriction of Hazardous Substances Directive.

China’s regulation on restriction of the use of certain hazardous substances commonly (China RoHS), is applicable to all Electronic and Information Products (EIPs) and parts sold in China after March 01, 2007. China RoHS regulation restricts the use of the same six substances as the European Union’s ROHS, but has requirements for product labeling and regulated substance information disclosure.

Harmonic complies with China RoHS Phase I for labeling and information disclosure requirements and continues to monitor new developments in China RoHS Phase II towards substance restriction and certification program.

For more information, please visit China RoHS regulation page at official US export website.

http://www.export.gov/china/doingbizinchina/

China RoHS Disclosure report

Below table shows the presence of hazardous substances, or elements in Harmonic products, if the part is present.

This table shows those components where hazardous substances may be found in Harmonic products based on, among other things, material content information provided by third party suppliers. These components may or may not be part of the product.

Unless special注明，哈雷公司产品的环保使用期限均为 20 年。该环保使用期限的有效条件为：必须遵循该产品使用手册的规定，对该产品进行使用或存储。

The Environmental Protective Use Period (EPUP) for Harmonic products is 20 years unless displayed otherwise on the product. The EPUP period is valid only when the products are operated or stored as per the conditions specified in the product manual.

O: 表示在该部件的所有均质材料中，此类有毒有害物质的含量均小于 SJ/T11363-2006 标准所规定的限量。

O: Indicates the content of the toxic and hazardous substances at the homogeneous material level of the parts is below the limit defined in SJ/T11363 2006 standard.

X: 表示至少在该部件的某一均质材料中，此类有毒有害物质的含量超出 SJ/T11363-2006 标准规定的限量。

X: Indicates that the content of the toxic and hazardous substances in at least one of the homogeneous materials of the parts is above the limit defined in SJ/T11363 2006 standard.

Other RoHS and REACH type regulations
Harmonic will comply with RoHS and REACH type regulations evolving in other countries, if they become relevant to our products or in markets where we sell our products.

Waste Electrical and Electronic Equipment (WEEE)

European Parliament and the Council of the European Union’s WEEE Directive (2002/96/EC) came into force on August, 2005 and, were more recently amended in July, 2012. This directive encourages the reuse, recycling, and recovery of WEEE and to improve the environmental performance of all operators involved in the life cycle of electrical and electronic equipment, especially those dealing with WEEE.
Harmonic ensures that all requirements for registration, reporting, design and data tracking are complied with to meet the objectives of the WEEE directive.

For more information, please visit WEEE directive page at official EU website: [http://ec.europa.eu/environment/waste/weee/legis_en.htm](http://ec.europa.eu/environment/waste/weee/legis_en.htm)

**Battery directive**

Review the European Union legislation on waste batteries.

In September 2006, the European Union's Directive 2006/66/EC (Battery Directive) came into force with an aim to prohibit the sale of batteries and accumulators containing hazardous substances and to set rules and promote collection, treatment, recycling and disposal of waste batteries and accumulators. This directive applies to spent batteries collected together with WEEE and requires their removal and separate collection. Once removed from WEEE, spent batteries are governed by the Battery Directive. Harmonic uses lithium batteries in its products and our responsibility under the Battery Directive is taken care of under our WEEE Take-Back program.

For more information, please visit Batteries and Accumulators directive page at official EU website. [http://ec.europa.eu/environment/waste/batteries/](http://ec.europa.eu/environment/waste/batteries/)

Harmonic is committed to manufacturing environmentally safe products for the community, and will make reasonable efforts and required adjustments to its practices, if necessary, to comply with various environmental directives and industry initiatives on the elimination of hazardous substances, labeling, marking, certification and registration as required in markets where we sell our products.

**WEEE Take-Back Request Program**

In order to assist EU member states to preserve, protect and improve the quality of the environment, protect human health and utilize natural resources prudently and rationally, Harmonic strives to recycle in compliance with the WEEE Directive any of its products that cannot be re-used.

Harmonic's customers should:

- Not discard equipment in household or office garbage
- Arrange proper recycling of unneeded equipment. For the take-back of Harmonic equipment, customers must:
  - Collect the information required to complete Harmonic's WEEE Take-Back Request form
  - Complete and submit the online WEEE Take-Back Request form. Please note that forms must be fully completed in order to prevent process delays
  - Receive instant online confirmation indicating the reference number
  - Receive the End of Life (EOL) asset return authorization number and instruction for EOL asset return
- Not ship EOL product to Harmonic without a Harmonic-provided EOL asset return authorization number

The crossed-out wheeled bin symbol on a Harmonic-branded commercial product indicates that the product should not be disposed of along with municipal waste, but invites our customers to return the product to us under Harmonic's WEEE Take-Back program for product disposal.
Harmonic will pay for the cost of shipping and will provide a Certificate of Recycling or a Certificate of Destruction upon request. For more information on collection, reuse and recycling or to initiate the WEEE take-back process, please complete the form at http://www.harmonicinc.com/webform/weee-takeback-request or contact Harmonic Technical Assistance Center (TAC) or email RMA team at rma.emea@harmonicinc.com.

Compliance with country specific environmental, safety and EMC standards

In addition to above listed standards and compliance regulations, Harmonic products may also be compliant with other country specific environmental, safety and EMC requirements.

Please contact Harmonic Compliance Team at regulatory.compliance@harmonicinc.com or your local sales representative for more information about compliance with particular country or standard.
